Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-24 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-24 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 1 and all claims that dependent therefrom, it is unclear/vague how the claimed elements interrelate to comprise a “fixed wavelength, external cavity semiconductor laser.” and the body of the claim does not support a “fixed wavelength, external cavity semiconductor laser.” For example, 1) what makes up the external cavity of the preamble? ; 2) where is the intra cavity filter located within the cavity relative to the assumed reflectors/mirrors of the cavity? ; 3) what comprises the modulation system and how is this system configured relative to the external semiconductor laser” and 4) what structural limitations are part of the intracavity that enable a “filter function.”

Regarding Claim 21 and all claims that depend therefrom, it is unclear/vague 1) how the collimating lens is attached to the filter material; and 2) what defines the “spectral filter material.” In addition, the claim recites an “intracavity composite filtering structure” in the preamble; however, the body of the claim does not recite any structure to support a cavity or specify any structural relationships that would clearly define the

location of the filtering structure within the cavity; accordingly, the claim is vague/indefinite.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Flanders et al. (US 6339603).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding Claims 1-24, Flanders et al. discloses a fixed wavelength, external cavity semiconductor laser, comprising:

- a semiconductor gain medium (422);
- an intracavity filter (410) having a filter function specifying a frequency response of operation of the laser; and
- modulation system (716) that modulates an optical length of the cavity to change spectral locations of longitudinal modes of the cavity relative to the filter function.

Art Unit: 2828

In addition, Flanders et al. clearly describes within the claims polarization rotators, coated facets, etc. as claimed by the Applicant.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vilhelmsson et al. (US5530714), Tayebati (US 6041071), Caprara et al. (US 6097742), Caprara et al.
